NEK 801:2024 Electrical installations and equipment for defence
and emergency response - Mobile units

NEK 801:2024 ble nylig oversatt til engelsk. Du kan kjøpe den [her](#)

This standard specifies requirements for electrical installations, -machines and -equipment in mobile units for use during operations by emergency responders. The units are used to perform a variety of functions during operations. EXAMPLE Power supply, communication, mess, storage and protection. The standard applies to units with TN-S and TN-C-S installations up to 1000 V AC.

The standard does not apply to: permanent infrastructure, vehicles, marine vessels, rolling stock, aircrafts and medical locations.
